

TA Meeting 2021.4.7

Requirements for part4:

1.addressing feedback from part 3

2.code base: (most important)

- Address all the user stories. (Have you completed the work?)
- Code quality.
- (have a final check before due date)

3. Code Documentation

- All source files (activities or not) need to have at least one comment line on top
 - Javadocs for model classes , maybe controllers as well(before the last commit)

4. Test:

1. Six unit test (for each functionality): **We only have 5**
2. Two intent tests:
 - a. Creating an experiment: Done
 - b. Adding a trial (do we have this one?)

5. Design:

- Update UML, especially all model classes

6. Backlog:

Have updated page on github wiki. Mark all user stories finished and such.

7. Storyboard:

Change it only if the UI is changed a lot (we don't have to i think)
Show one activity navigation drawer

8.Sprint Planning and Reviews

Upload all the meeting and feedback notes

9. Demonstration

Have a practice before it.

Make a video, showing:

Don't cover all the user stories in 5 minutes.

Focus on showing functionalities and features that are unique.

10. Tool use:

_____Done

Notes:

Inside README, address the reason why android studio showing error for the unimported classes.
