

Model

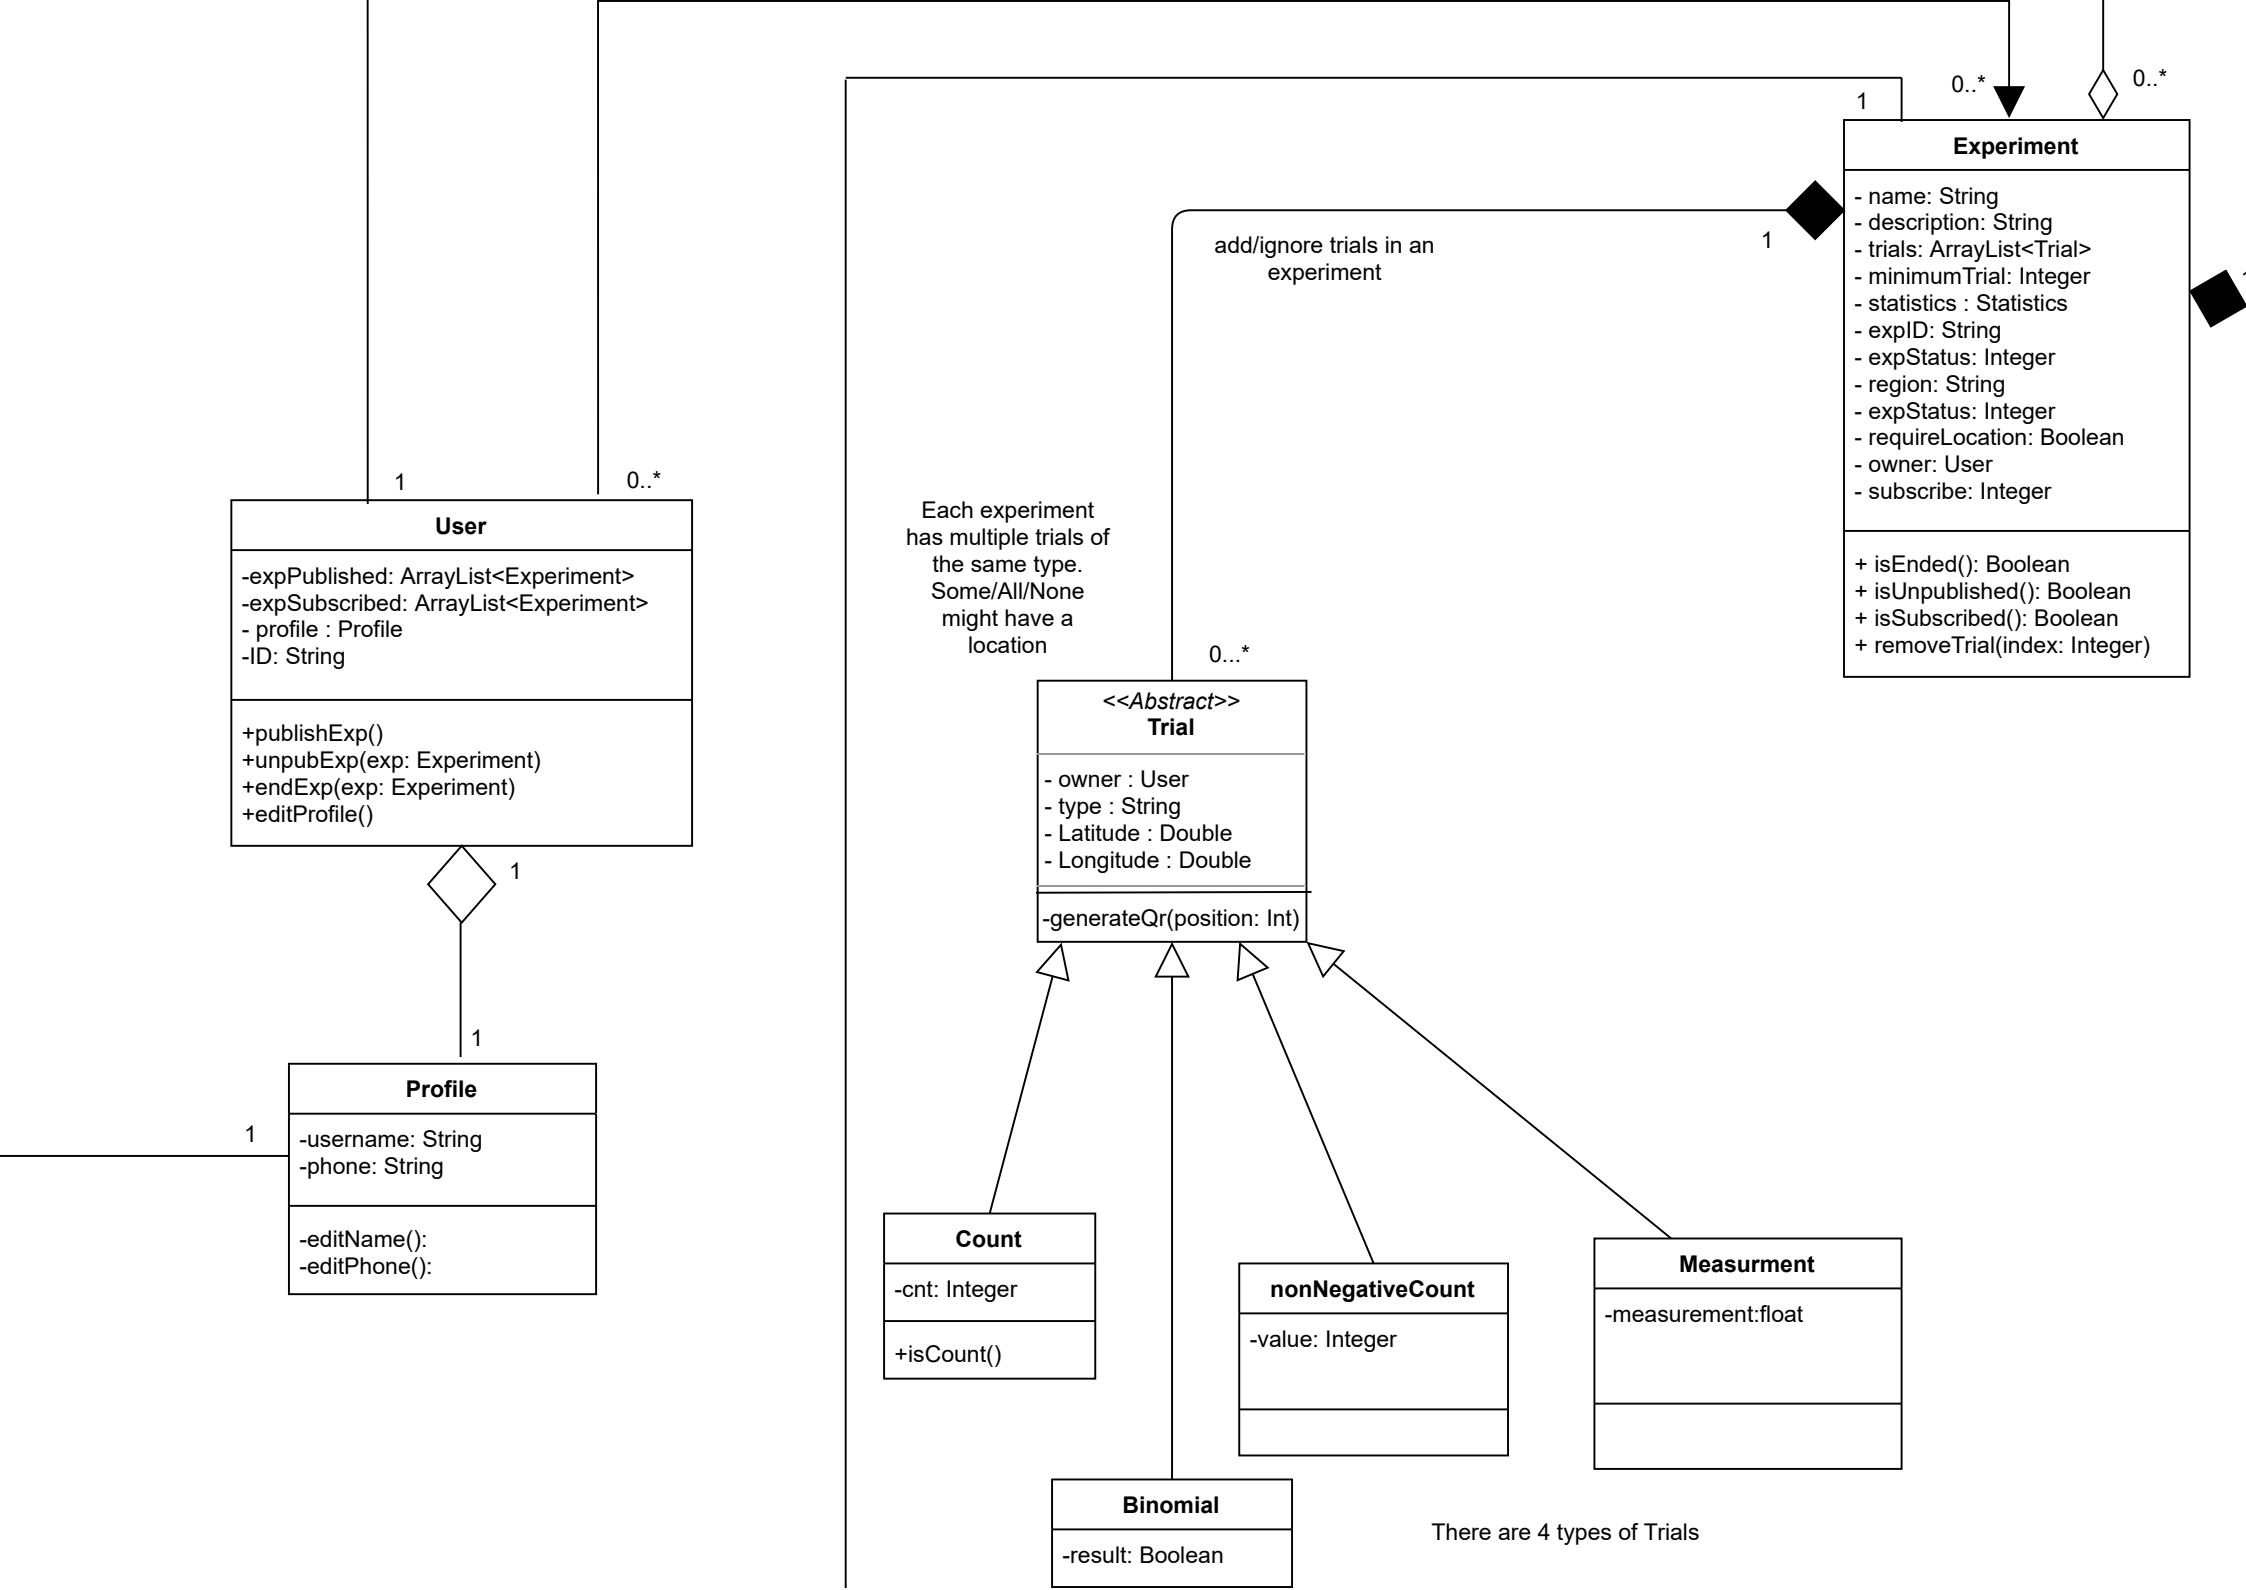

Experiment has an owner

user can create and subscribe experiments

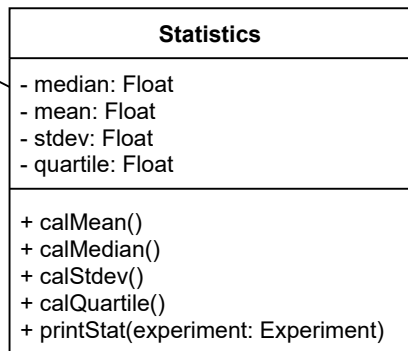

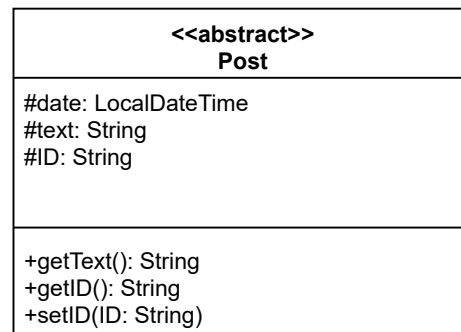

1

1..\*

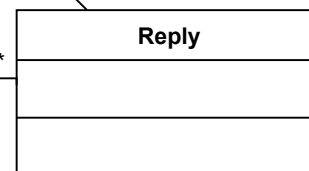

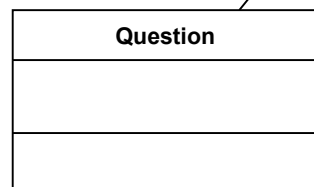

Calculates statistics for the experiment

in Part 3, the displaying date feature has not been implemented yet, will be added in part 4.

setText() is not really used since a Post is created by providing a text

add replies to a question

1

0..\*

This composition is not obvious in the code, but achieved inside the database by using collection and sub collections.

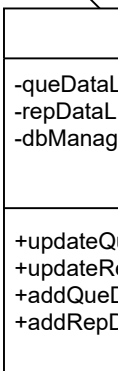

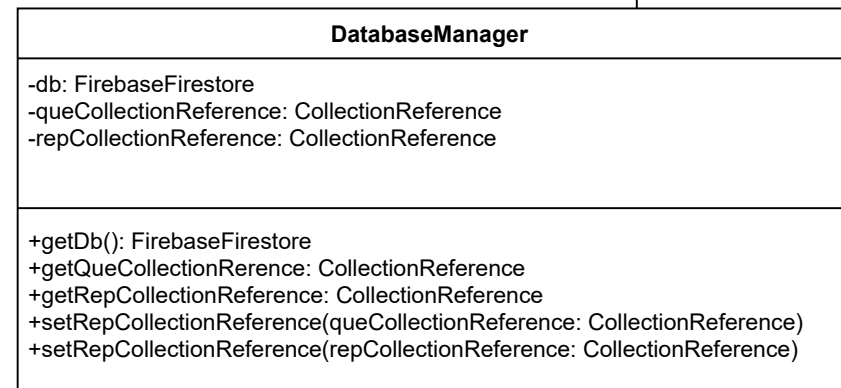

0..\*

0..\*

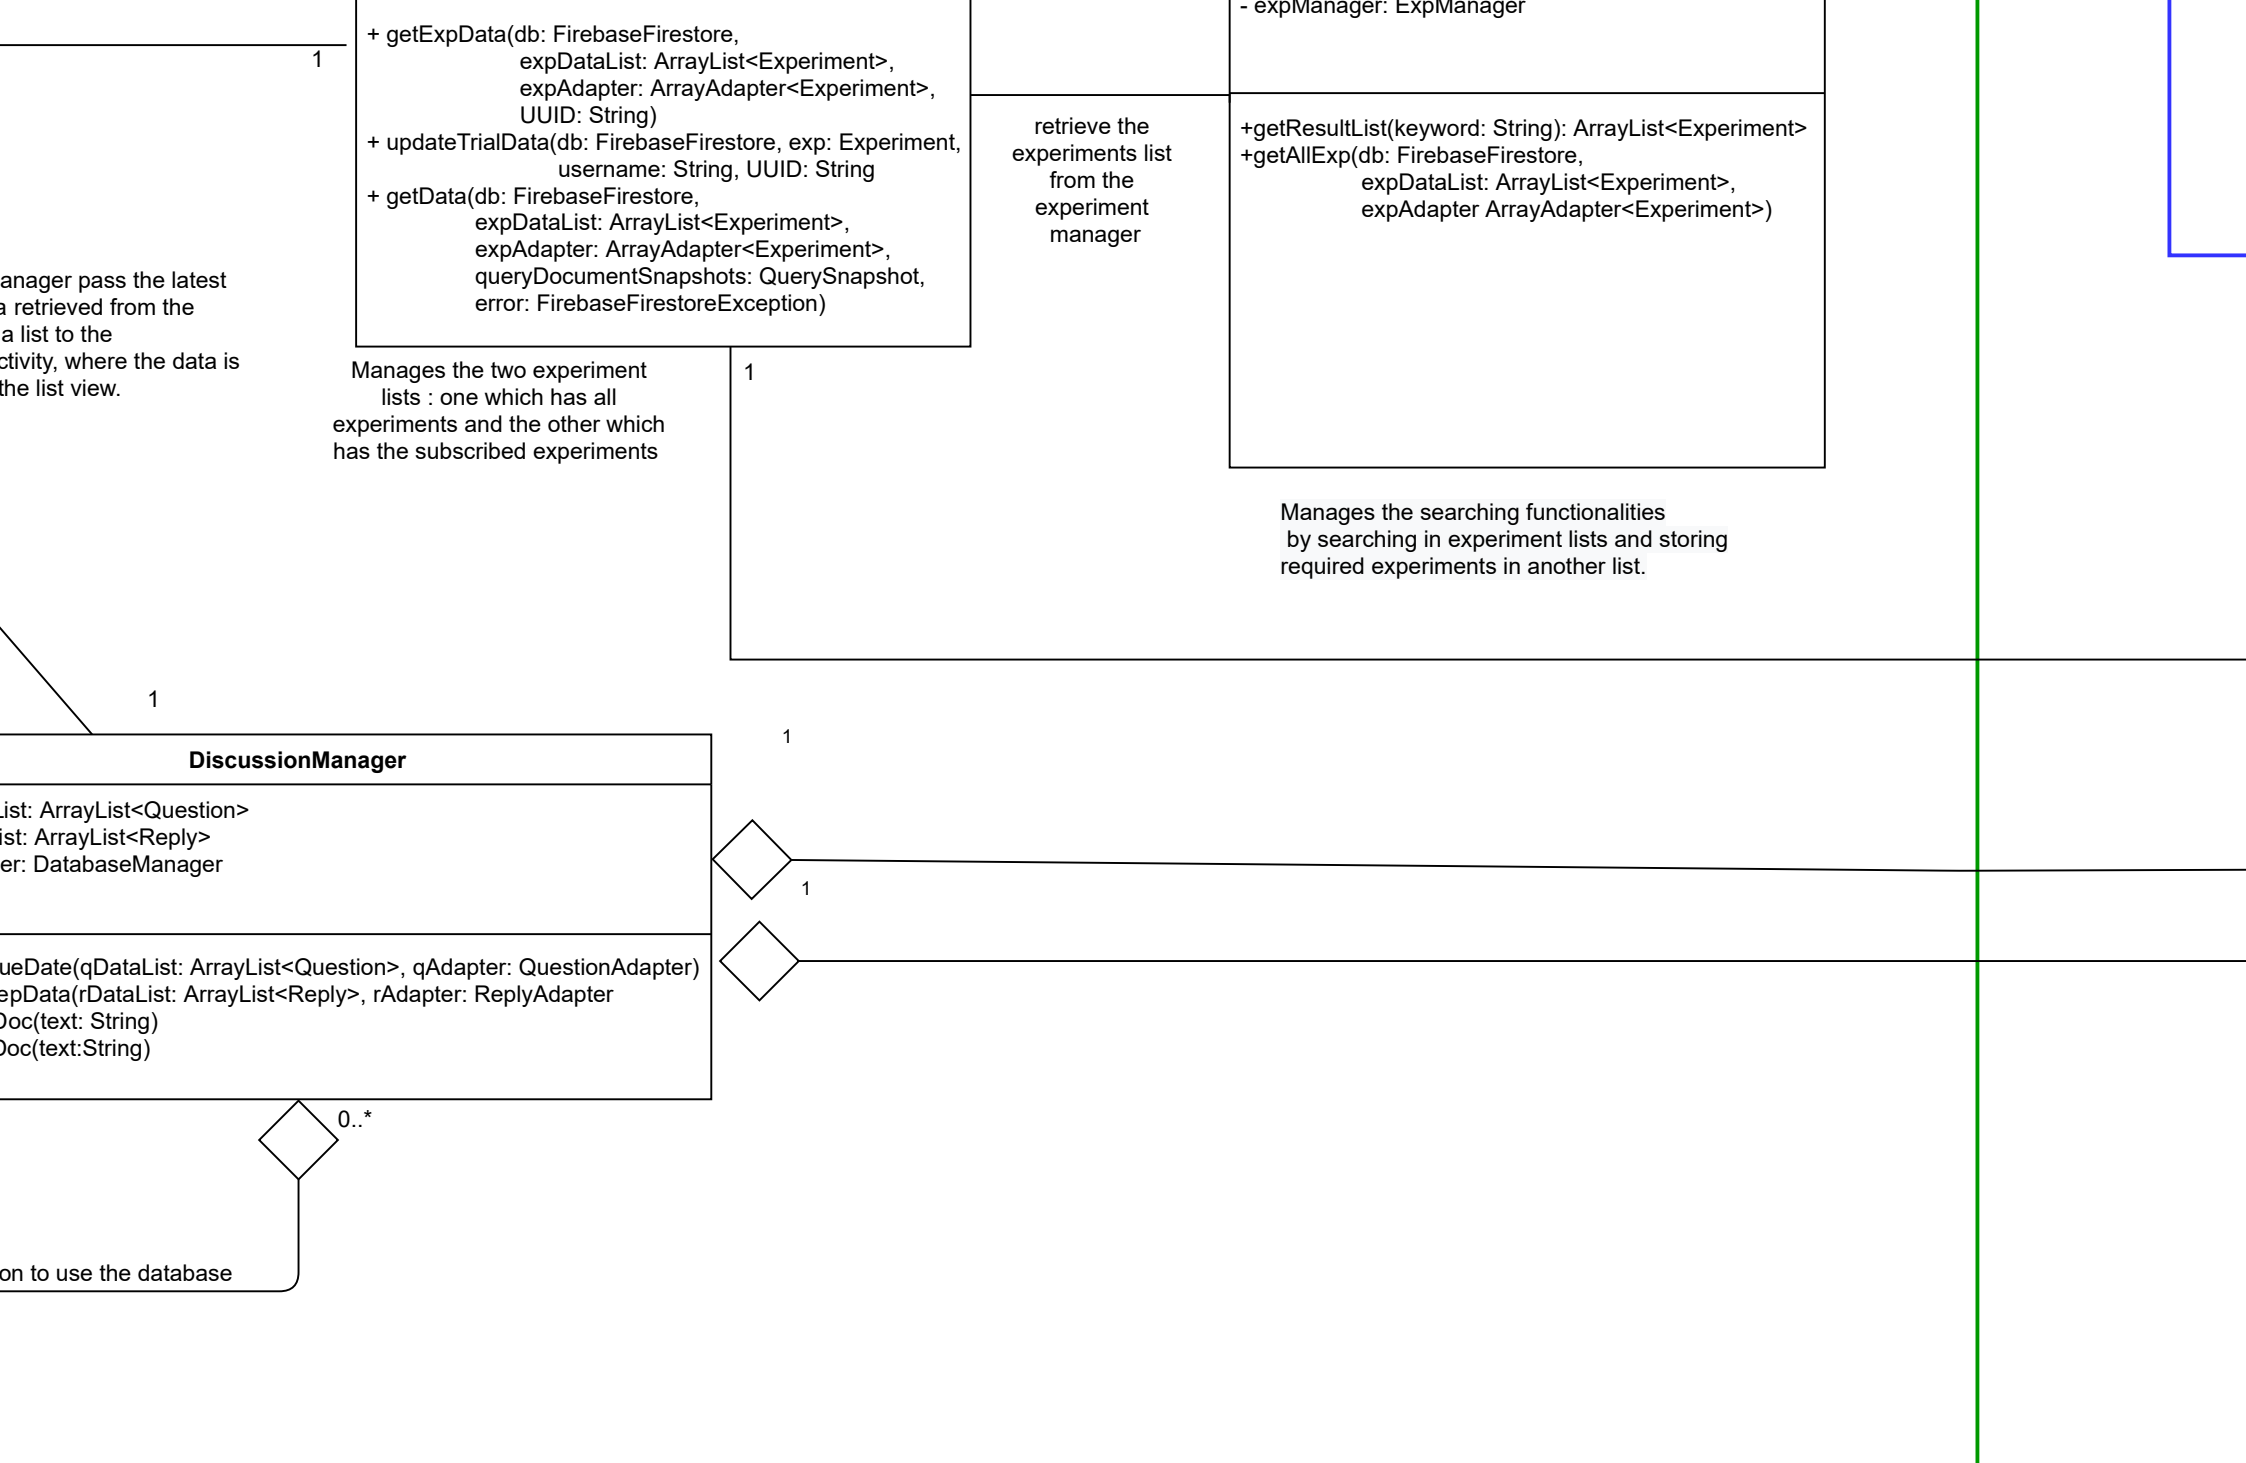

DiscussionManager pass the latest  
reply data retrieved from the database  
as a list to the QuestionActivity, where  
the data is displayed in the list view.

DiscussionM  
question data  
database as  
DiscussionA  
displayed in t
