# Meeting: 2021.3.17 Wed 12pm

--------------------------------------------

**Update (What's get done):**

**Charffy:** Finish the functionalities related to the question; now the DiscussionActivity can use DiscussionManager to update listview, so does QuestionActivity.

**Caleb:** Searching is able to show all experiments in the database.

**Ananya:** Done with location functionality. Fixed layout errors.

**Marzook:** Done with trials functionality, unit test for trial.

**Anthony:** Finished all Qr code functionalities and comments

**Anisha:** Finished with publishing an experiment functionality, displaying the list on the main screen with the current user owned experiments, displaying the content of the experiment, pushing data for publish in db. Alert message box for required fields in publishing an experiment along with the marker(red asterisk). Got the main activity function working in expManager

## Sprint Planning:

**User Stories (updates):**

**Assigned tasks:**

**Charffy:** unit test for question; edit UML.

**Caleb:** unit test for profile editing, edit UML, edit storyboard for profile, open experiments when clicked in search activity

**Ananya:** Testing for maps.Fix errors in codes. Clean up code and proper comments + revisa java docs

**Marzook:** Update Trial info properly on firebase, java docs and clean code.

**Anthony:** Write tests, fix UML

**Anisha:** get publish experiment part moved to expManager, unit test for experiment, finalise and clear up the code, add necessary comments and reference comments, UML (look into working with DatabaseManager)

## Before next meeting:

1. **Sprint Review: your updates according to Alex's feedbacks in the feedback google doc (everyone should write down something you have done in response to Alex's suggestions)**
2. **When you create test classes, make sure you have "Test..." in the name. (a general test class that is responsible for testing methods from classes that have close collaboration)**
3. **UML: fix the UML to meet your requirements of the code.**
4. **Product Backlog: update the user stories when you meet some issues. (add comments under that issue on github)**
5. **Update storyboard: very last thing do. (only if workflow changes)**

## Planning :

**Plan for next TA meeting: (Thu)**

1. Documentation: UML   ----- IN PROGRESS
2. Fix bugs  ----DONE
3. Test case     --- IN PROGRESS
   a. At least one unit test for each functionality
   b. On intent test (eg. publish an experiment)
4. Code convention  (email Alex)
5. Demo          (in Lab)

**Plan for next meeting: (Fri)**

1. Final polish of the UML
2. Final polish of storyboard: change Profile
3. Check the updated version of UML and storyboard
4. Update them on wiki
5. Generate javadocs
