TA Meeting 2021.4.1

Feedback from part3:

Grade: Good (10/12)
   A not-quite excellent submission that meets the majority of all the requirements without problem.

Feedback
(Only deliverables for which I have comments are mentioned)

Code Base:
Could not find a way to ignore a result.
QA US appear complete **(I think the UI could be improved though).**
     1. Show how many replies the question has.
         a. Add a field for Question collection
         b. Add a textview in the question content layout
How can I see the profile of another user? (going to be implemented in the DisplayExpeirmentActivity)
No search functionality at the moment just browsing.
Most Geolocation US covered.
About 1/2 of US complete.

Code Documentation:
Make sure you have **at least some comments** in your view/controller classes even if you don't add them to the Javadoc.

Test Cases:
Unit tests all pass. Intent tests pass but UpdateProfileTest seems to get stuck at openProfile
- Have addressed this, just need to push.

Design:
Consider organizing your **source files** into directories.
- Divide maybe into model-view-controller directories (3 folders)
Remember to follow encapsulation principles as much as possible (including in Activity classes).

UI:
Can you think of a way to add additional navigation options when inside of nested menus (**ex. I want to stop creating a trial and quickly search for another experiment or go to my subscription list, etc.)?**
- Maybe have three buttons for searching, user, go back to my experiment list, on every activity screen.
- Add a Home button?

General notes

- Try to show as much information. Don't want to tap a bunch of buttons to show information.
- Reduce activities for this maybe?

- Navigation drawers?

-

Real presentation: 15th april : 5:53 pm

Planning:

1. **Team meeting on this Friday is canceled, using this time to work on individual tasks.**
2. **Team meeting next Monday at 12pm.**
3. **TA Meeting next Wednesday at 12pm, then going to have a team meeting after it**
4. **TA meeting for mock presentation next Thursday**

5. **Team meeting next Friday at 12pm for a final review for part 4.**
6. **Real presentation: 15th april at 5:53 pm**
